For many years, Miller & Martin's team of healthcare attorneys has advised hospitals, physician groups, insurers and other healthcare organizations in all aspects of merger and acquisition transactions.

Our team of healthcare attorneys regularly consults on compliance with Stark, Fraud & Abuse, HIPAA, false claims and other constantly-changing laws and regulations that impact the fundamentals of the structuring and negotiation of healthcare transactions. We also have decades of experience in other areas that regularly impact healthcare transactions such as antitrust, reimbursement (including most recently the Affordable Care Act), for-profit and nonprofit income taxes, and information, security and data breach.

Our Healthcare Group combines over a century of experience in corporate transactions with deep knowledge of the regulatory and privacy aspects of the healthcare industry. This combination of skill sets and experience permits Miller & Martin to offer a full range of healthcare M&A advice in an efficient, cost-effective manner.
